Starlit Medical, founded in 2014 within Qingdao University of Science & Technology (renowned as China's cradle of rubber/plastics), specializes in R&D, production, and sales of critical components for medical endoscopic devices. Focused on applying natural latex and polymer materials to minimally invasive interventions and endoscopic therapies, we collaborate with the National Rubber/Plastics Key Laboratory. Our expert team (PhD/MS/postdoctoral researchers) leverages advanced materials and processes to drive product innovation aligned with global surgical advancements, while providing technical support to hospitals, academic institutions, and clinics.

Vision

Providing perfect products and services to the globally leading manufacturers of NOTES technology; engaging in the development and manufacturing of polymer materials, striving to be the competitive provider in this field.

Mission

Offering advanced technology and service to minimally invasive and interventional device manufacturers

极致、分享、为客户创造价值
EXTREME, SHARE, CREATE VALUE FOR CUSTOMERS
